SUMMARY

Full-stack developer with a Computer Science degree and hands-on experience building production-grade web applications, AI automation systems, and SaaS tools. Proven ability to ship real products independently — from lead generation platforms to financial analytics dashboards. Strong focus on automation, business process optimisation, and building tools that solve genuine operational problems.

EDUCATION

BSc Computer Science — University of Westminster (Sep 2022 – Jul 2026)

Foundation Certificate — APIIT (Oct 2021 – May 2022)

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, Next.js, React.js, Node.js

Databases: Supabase, Firebase, Cloud Firestore

APIs & Integrations: Google Maps API, Gmail API, Resend API, Cloudinary, Discord Webhooks, yFinance

DevOps & Deployment: Railway, Vercel, Cron Jobs, Webhooks

AI & Automation: Generative AI integration, Google Gemini, AI model training, Business Process Automation

Other: Web Scraping, E-Commerce (Shopify), Financial Modelling, Supply Chain Management

PROJECTS

[Mails2Leads](#) (use code admin-secret248#) — **Automated Multi-Channel Lead Generation Platform** | Built a fully automated outreach system using Google Maps API and Gmail API to scrape, validate, and contact leads weekly via cron job. Configured rate limiting to operate entirely within Google's free tier. Used personally for business development — demonstrating ability to build production tools that solve real commercial problems. *Stack: Next.js, Google Maps API, Gmail API, Python*

[CashFlow](#) — **Financial Analytics Platform** | Built a financial tracking platform beyond standard bookkeeping — includes real performance metrics, loan coverage tracking, budget management, and recurring revenue analytics. Deployed and used personally for business financial management. *Stack: Next.js, Supabase, Financial Modelling* [Live demo: [cashflowvxx.vercel.app](#)]

[OurLeads](#) (Test) — **Lead Tracking & Outreach Platform** | Built an automated lead scraping and outreach platform that pulls prospects from Google Maps weekly, validates contacts, and enables personalised multi-field email campaigns. Designed for scale with rate-limit compliance built in. *Stack: Next.js, Supabase, Google Maps API*

[OurSupply](#) — **Supply Chain Management App** | Built an inventory and supply tracking application for a small business — manages recurring orders, shipment tracking, and inventory levels. Integrated directly with the CashFlow platform for real-time cost syncing. *Stack: Next.js, Supabase*

[Sisira Auto Parts](#) (Backend not connected for test deploy) — **Business Digitalisation (volunteer project)** | Led end-to-end digital transformation of a physical auto parts business. Built a fully scalable web application on the FERN stack, digitised physical records into structured CSV databases, implemented AI-powered customer response automation using historical sales data, and established social media presence. Integrated WhatsApp for customer orders. *Stack: React.js, Node.js, Firebase, Cloudinary, Generative AI*

[MSS Trading Alert Bot](#) (Github link attached) | Project Built a Python-based algorithmic trading bot that scans 15-minute MSS setups within 4H combo structures every 15 minutes. Sends real-time alerts to Discord via webhooks. Deployed on the railway for continuous operation. *Stack: Python, Railway, yFinance, Discord Webhooks*

[LankaMods](#) — **Automotive Marketplace MVP** | Built an automotive marketplace for Sri Lankan car modification businesses — curated listings with parts links, an affiliate revenue model, and an admin dashboard for partner management. *Stack: Next.js, Supabase, Tailwind CSS* [Live: [lankamods.vercel.app](#)]

[LankaSupply](#) — **B2B Supplier Marketplace MVP** | Built a supplier discovery platform connecting Sri Lankan entrepreneurs with vetted suppliers across sourcing, packaging, and logistics. Designed to scale into a full-service fulfilment company. *Stack: Next.js, Tailwind CSS*

EXPERIENCE

99x Colombo (Software Engineering - Internship)

May 2025 - Nov 2025 | Involved in the development of Superglu, an internal corporate social platform designed to build & strengthen interpersonal connections by aligning individuals based on shared interests. Additionally, contributing to the design and implementation of an agentic workflow (Microsoft ecosystem) for the performance appraisal process, streamlining evaluations, and enhancing organizational efficiency.

Co-Founder — Syndicate

Est. 2024 | Software Development & Marketing Agency Co-founded a software development and marketing services company. Responsible for technical architecture, client delivery, and marketing funnel optimization (+strategy).
